

Boost profits with Flex Delivery

Delivery can increase orders by up to 100%. But while some apps eat into profits, we make sure you don't leave money on the table.

Start with a \$50 order

We'll compare how much you can earn with us versus the other apps.

Delivery Costs Per Order

While other apps charge up to 30% in delivery commissions, ChowNow has a flat fee of \$3.99 and zero commissions.

Restaurant Profits

Those high commissions can end up costing you a lot more - over 2x in fees on a standard order. Flat fees help you earn more on every delivery.

Annualized Profits

Over time, savings grow and profits compound. For every 1,000 orders, you can save thousands on fees.
